Subject: Re: No loopholes in Dodd-Frank

1) Securities and Exchange Commission/Commodities Futures Trading Commission, Re: Commercial Risk (CFTC RIN 3235-AK65, SEC File Number S7-12-10)

Dear Commissioners Shapiro and Gensler: For the continued existence of the decent earning part of the USA public, we plead with you to not let the American Bankers Association (ABA) redefine important terms like “commercial risk” to keep banks that engage in risky derivatives trading from complying with transparency and business conduct requirements. Commercial risk should not be expanded to include financial risk. Accepting the ABA argument would open the door for exemptions for risky hedge funds and insurance companies. That is the opposite of what is needed. Please save us.

Thank you.

2) Commodities Futures Trading Commission, Re: Position Limits (RIN 3038-AD17)

Dear Commissioner Gensler: The CFTC needs to set strong position limits to crack down on the energy and food commodity speculation that serves no productive purpose, and plenty of damage. I urge the Commission to define limits that will address not only manipulation, but also excessive speculation, which will require a stricter approach.

Thank you.

3) U.S. Department of the Treasury, Re: FX Swaps (75 FR 66426 Document Number 2010-27274)

Dear Secretary Geithner: Please, please say “no” to foreign exchange traders who want to exempt foreign currency derivatives from the clearing and transparency requirements of the Dodd-Frank Act. Keep the Dodd-Frank Act as strong as it is, and save our economy from more destruction. \$4 trillion dollars a day is traded in these highly-leveraged swaps and this number may increase to over \$10 trillion in a decade. As the head of the Financial

Stability Oversight Board your job is to decrease risk in the system, not encourage off-book trading and opaque markets.

Please decrease the risk. Thank you.
